BUSINESS CONTINUITY MANAGEMENT

Contemporary events have clearly highlighted the vital importance of being prepared for the unexpected. Regrettably, too many businesses underestimate the potential adverse effects of incidents beyond their control: climate change; sudden political instability; terrorism; human induced accidents the impacts of unforeseen events on businesses can be very costly, possibly even devastating.

SHIELD has been at the very forefront in assisting organisations, both here in Malta as well as internationally, in managing operational risk.

Following closely the world-class guidance provided by the **Business Continuity Institute (UK) Good Practice Guidelines (2018 Edition)** this short course is specifically designed and intended to enable professional practitioners to understand the value of embedding business continuity practices in building up and improving resilience.

This Course is an introduction to the SHIELD BCM Competence Program.

IMPROVE your personal competence in all key areas: (1) *Skill* (2) *Experience* (3) *Attitude* (4) *Knowledge*.

LEARN from and by interacting with experienced subject matter specialists.

KICK-START the business continuity lifecycle in your organisation.
