

CLIMATE CHANGE RESEARCH SEMINAR SERIES

Climate Change and Disaster Risk Reduction: Trends and Economic Challenges in Malta.

Organised by the Climate Change Research Platform of the University of Malta* and PRIMO

**IT Services Building, Room VC102
Tuesday 29 November 2016**

The Climate Change Platform (CCP) was set up, under the auspices of the Islands and Small States Institute, to facilitate collaborations between University of Malta entities and individuals interested in climate change issues, and to promote research and teaching initiatives relating to climate change (<https://www.um.edu.mt/islands/climate>).

The aim of these research seminars is twofold, it presents state of the art research developed by members of the University of Malta, and identifies gaps where further research is needed to support policy.

**Under the auspices of the Islands and Small States Institute, and with the contribution of the Institute for Sustainable Development and Climate Change, and the Institute for European Studies.*
